Price List**

VTC Video Services provides a full range of production capabilities from non-linear editing to 3D graphics animation, graphic design to picture-to-video, PowerPoint and DVD authoring. Our experience in non-linear editing comes from being one of the first facilities in our production niche with a fully digital editing suite. We consistently research what products are being used in the large production houses and then make that technology available at a fraction of the cost. With our cutting edge software, state-of-the-art hardware, and time tested creativity, we can make your multi-media vision a reality.

In the field we shoot with state of the art DV Digital Cameras and HD Cameras. We light, mic and provide all of the elements to make your vision come to life. We also provide a multi-platform video duplication service that can take care of all of your copying needs.
